IL NUOVO CIMENTO

della società italiana di fisica

La collaborazione al *Nuovo Cimento* è aperta ai cultori di fisica di tutti i Paesi. I lavori possono essere scritti in francese, inglese, italiano, spagnolo o tedesco.

Si prega vivamente d'inviare i lavori destinati alla pubblicazione, in duplice copia, direttamente ed esclusivamente al **Direttore del Nuovo Cimento, via degli Andalò, 2 - 40124 Bologna**. Ciascuna copia, scritta a macchina su un solo lato del foglio, deve essere corredata di un riassunto in italiano ed in inglese, disegni, fotografie, numero completo del Physics and Astronomy Classification Scheme (PACS) e bibliografia con i nomi e le iniziali di tutti gli autori; una serie di disegni originali in inchiostro di China su carta da lucidi deve essere allegata alle copie del lavoro; le eventuali fotografie devono essere stampate su carta bianca lucida pesante. Tutti i lavori devono essere accompagnati da una lettera nella quale se ne richiede esplicitamente la pubblicazione sul *Nuovo Cimento* e si indica l'Ente o la persona che pagherà i contributi alle spese di stampa. Non si accettano manoscritti in una sola copia od incompleti; in tal caso la Direzione richiederà agli autori l'invio delle parti mancanti, ritardando così la pubblicazione del lavoro. In ogni caso sarà considerata come data di ricezione del lavoro quella del giorno in cui gli autori avranno ottemperato a tutte le suddette condizioni. I manoscritti non si restituiscono.

Di regola le bozze sono inviate agli autori una sola volta, salvo che siano state esplicitamente richieste seconde bozze.

Dopo la pubblicazione del lavoro sul *Nuovo Cimento* la Direzione inviterà l'Ente sotto il cui nome è stato pubblicato il lavoro a versare all'**Editrice Compositori, viale XII Giugno, 1 - 40124 Bologna** un contributo alle spese di stampa in ragione di L. 30.000 per pagina di stampa; il pagamento di tale contributo dà diritto a ricevere complessivamente 50 estratti gratuiti senza copertine. Nel caso che il lavoro sia stato presentato da più Enti, la Direzione rivolgerà tale invito ai singoli Enti, ripartendo egualmente tra di loro il contributo totale, salvo indicazione contraria contenuta nella lettera di presentazione. Contemporaneamente saranno addebitate le spese per le correzioni dovute ad insufficienze del manoscritto inviato per la pubblicazione, modifiche del testo originario, modifiche o rifacimenti di figure, ecc.

A richiesta maggiori quantitativi di estratti (eventualmente con copertine stampate e montate apposta) possono essere forniti secondo la tariffa che la Redazione comunicherà agli interessati. Anche l'importo di tali estratti sarà addebitato assieme all'invito a versare i contributi alle spese di stampa.

Norme più dettagliate si trovano nella « Guida per gli Autori », che viene inviata dietro versamento di L. 650.

I libri per le recensioni devono essere inviati all'**Ufficio Recensioni e Segnalazioni del Nuovo Cimento, Via degli Andalò, 2 - 40124 Bologna**.

Contribution to *Il Nuovo Cimento* is open to physicists of all Countries. Papers may be written in English, French, German, Italian or Spanish.

Manuscripts submitted for publication should be sent in duplicate and only to **The Director of Il Nuovo Cimento, via degli Andalò, 2 - I 40124 Bologna (Italy)**. Each copy, typewritten on one side of the sheets only, must be complete with an English summary, drawings, photographs, complete PACS (Physics and Astronomy Classification Scheme) number and references with the names and initials of all the authors; a set of original drawings in India ink on tracing paper must be enclosed with the copies of the manuscript; photographs must be on heavy-weight glossy white paper. All papers must be accompanied by a letter in which their publication in *Il Nuovo Cimento* is clearly requested. The institution or the person to bear the publication charges must also be specified. Manuscripts either in single copies or incomplete will not be accepted and authors will be requested to send the missing items, thus delaying the publication. In any case the day in which all the above-mentioned items were received will be considered as reception date of the paper. Manuscripts will not be returned.

Proofs will be sent only once unless second proofs are specifically requested for by the author.

After the publication of the paper in *Il Nuovo Cimento* the institution supporting the paper will be asked for a publication charge of US \$30.00 per printed page by the Director's Office, payable to **Editrice Compositori, viale XII Giugno, 1 - I 40124 Bologna (Italy)**; the payment of this charge entitles to receive in total 50 free reprints without covers. If the paper bears the names of more than one institution, the Director's Office will send this request to each institution, sharing the amount among them, unless indications to the contrary are specified in the covering letter. At the same time the expenses for corrections due to lack of clarity of the manuscript submitted, modifications to the original text, modifications or remaking of figures, etc. will be charged.

Additional reprints as well as covers printed to order may be supplied on payment. The Editorial Office will give the corresponding prices on request. Also the cost of these additional reprints will be charged with the request to pay the publication charges.

Further details are contained in the « Guide for the Authors », which will be sent against payment of US \$1.00.

Books for review should be sent to **Ufficio Recensioni e Segnalazioni del Nuovo Cimento, via degli Andalò, 2 - I 40124 Bologna (Italy)**.

- Entropy, irreversibility and the second law of thermodynamics (Some reflections on the nature of), *J. Mehra* and *E. C. G. Sudarshan*. 11 B, 215
- Fermion problems (An algorithm for solving), *J.-P. Eckmann* and *M. Guenin*. 16 B, 85
- Fundamental problems in thermodynamics (Some), *R. G. Bowers*. 29 B, 303
- Green's functions and collective effects in a Fermi system (Two-time), *P. Gluck*. 3 B, 67
- Green's functions and thermodynamics of a nonideal Bose gas, *P. Gluck*. 9 B, 131
- « Green's functions and thermodynamics of a nonideal Bose gas » by *P. Gluck* (Comments to the paper), *V. N. Popov*. 16 B, 404
- Kinetic equations (On the existence of), *J. Biel*, *J. Marro* and *L. Navarro*. 20 B, 55
- KMS boundary condition (On the classical), *G. Gallavotti* and *E. Verboven*. 28 B, 274
- Master equation and the arrow of time (The), *H. Krips*. 3 B, 153
- Planck distribution in a classical nonlinear coupled harmonic-oscillator system, *J. Wallace*. 22 B, 22
- Response function (Quantum-statistical), *O. Malo*. 21 B, 171
- Second law and adiabatic unattainability (The), *J. Dunning-Davies*. 10 B, 407
- Spin relaxation function (On the behaviour of the), *G. Casati* and *A. Scotti*. 10 B, 545
- Structure of subdynamics in nonequilibrium statistical mechanics, *C. C. Chiang*. 25 B, 125
- Unstable-particle gases in the degenerate sea, *M. D. Delano*. 11 B, 106

2. VIBRAZIONI - ONDE - ACUSTICA

- Discontinuity in self-similar flows (Evolution of), *S. G. Tagare*. 11 B, 73

2.1. Ultrasuoni

- Ultrasonic absorption and compressional viscosity due to structural rearrangement in hexane and toluene (Pressure dependence of), *S. K. Kor*, *B. K. Singh* and *G. Rai*. 12 B, 205
- Ultrasonic absorption in water and heavy-water mixture (Excess), *K. Lakshmi Narayana*, *K. Mallikharjuna Swamy*, *J. Sreerama Murty* and *P. Sitarama Swamy*. 25 B, 208
- Ultrasonic study in binary mixtures of water and heavy water, *S. K. Kor*, *B. K. Singh* and *S. C. Deorani*. 8 B, 367
- Ultrasound velocimeter in liquids (A new), *P. Marietti*, *G. D'Arrigo* and *P. Tartaglia*. 10 B, 537

3. MAGNETISMO

- Antiferromagnets (Two-dimensional): n.m.r. anomaly in the neighbourhood of the critical temperature, *C. Bucci* and *G. Guidi*. 8 B, 53
- Ferromagnetism and antiferromagnetism (On), *A. Messager* and *J. C. Trotin*. 9 B, 259
- Green's function theory of ferromagnetism based on the two-spin system (Remarks on the), *I. P. Fittipaldi*, *M. D. Coutinho Filho* and *J. G. Ramos*. 11 B, 23
- Ground state of the infinite Heisenberg antiferromagnet (Concerning the), *H. Reeh*. 17 B, 7
- Heisenberg ferromagnet utilizing anticommutator Green's functions (Spin- $\frac{1}{2}$), *J. O. Lawson* and *S. J. Brient*. 15 B, 18
- Heisenberg ferromagnet via anticommutator Green's functions utilizing Tyablikov decoupling (The spin- $\frac{1}{2}$), *J. O. Lawson* and *S. J. Brient*. 15 B, 25
- Hysteresis loops characterized by multiple frozen-in viscosity jumps, *A. Ferro* and *G. P. Soardo*. 4 B, 135
- Itinerant electron ferromagnetism. *T*-matrix approach, *A. K. Rajagopal*. 1 B, 48

- Magnetic dipoles (Forces acting on), *P. Hraskó*. 3 B, 213
 Magnetic field (On the origin of the), *A. Bergström*. 14 B, 235

3.1. Elettrologia.

- Distribution of stored electrons in the presence of self-fields (Exact longitudinal equilibrium), *J. Haissinski*. 18 B, 72

4. ELETTROMAGNETISMO

- Acceleration and radiation around oblique rotators, *A. Cavaliere*. 5 B, 110
 Chu-Haus-Penfield principle of virtual power (On the), *C. Lo Surdo*. 13 B, 217
 Classical electrodynamics (Predictive solutions of), *A. Salas and J. M. Sánchez-Ron*. 20 B, 209
 Collisional models on the dispersion properties of electromagnetic waves (Effect of), *G. P. Gupta and R. N. Singh*. 26 B, 57
 Determination of $N(h)$ in the D-region (A new method for the), *G.-C. Rumi*. 10 B, 240
 Dynamics for charged particles (Causal classical), *G. H. Goedecke*. 30 B, 108
 Dynamics for charged particles (Classical), *G. H. Goedecke*. 28 B, 225
 Eigenvalues of random matrices (Correlation between), *Thien Vo-Dai and J.-R. Derome*. 30 B, 239
 Electrodynamics of a one-dimensional *Hohlraum* (Classical). Invalidity of the equipartition law, *P. Bocchieri, A. Loinger and F. Valz-Gris*. 19 B, 1
 Electrodynamics without advanced fields or asymptotic conditions, *P. A. Hogan*. 15 B, 136; 19 B, 122 (E.C.)
 Electromagnetic fields (Problems of regularization of), *P. de Santis and G. Franceschetti*. 20 B, 149
 Electromagnetic self-force according to conformal symmetry (The theory of the), *R. L. Ingraham*. 27 B, 293
 Electromagnetic self-stress in nonlinear classical electrodynamics (A condition for vanishing), *J. Rafelski, L. P. Fulcher and W. Greiner*. 7 B, 137
 Electromagnetic-wave propagation in a random dispersive medium, *Y. M. Chen*. 11 B, 39

- Electromagnetic-wave scattering by fixed obstacles (On the rigorous approximation methods for), *M. L. Calvo and A. Duran*. 29 B, 277
 Electromagnetism for polarizable bodies (On the foundations of), *M. Pitteri*. 18 B, 144
 Electron, a model for an extended charged particle (The classical), *G. Horwitz and J. Katz*. 3 B, 245
 Electron, a model for an extended charged particle (The classical). - II: Inclusion of gravitational effects in general relativity, *J. Katz and G. Horwitz*. 5 B, 59
 Electrovac fields (Stationary cylindrically symmetric), *N. Arbex and M. M. Som*. 13 B, 49
 Fields of a massive charged source described by complex tetrads (Gravitational and electric), *P. D. P. Smith*. 29 B, 71
 Galilean electromagnetism, *M. Le Bellac and J.-M. Lévy-Leblond*. 14 B, 217
 Huggins term in classical electrodynamics (The physical consequences of the), *P. A. Hogan*. 16 B, 251
 Interaction of harmonic oscillators with the radiation field (On the), *K. Rzążewski and W. Żakowicz*. 1 B, 111
 Interactions between charged particles (Classical): an ordering procedure, *C. Lo Surdo*. 16 B, 139
 Lorentz-Dirac equation and positive-definite energy in classical electrodynamics (The), *D. Leiter*. 23 B, 391
 Maxwell's equations in the electrodynamics of moving bodies, *A. Viviani and R. Viviani*. 28 B, 191
 Motion in a constant field and the Schott energy (Relativistic), *J. C. Herrera*. 1 B, 155 (E.C.)
 Stress waves exist in classical electric and magnetic fields? (Do), *B. Liebowitz*. 13 B, 121
 Time delay and pre-acceleration, *J. Cohn*. 26 B, 47
- ## 5. OTTICA
- Behaviour of a two-level system in interaction with an electromagnetic field (Long-time), *P. Meystre, E. Geneux, A. Quattropani and A. Faist*. 25 B, 521
 Coherence functions (Higher-order angular), *G. P. Agrawal*. 18 B, 265

- Coherence functions in the far-field diffraction plane, *A. K. Jaiswal, G. P. Agrawal and C. L. Mehta.* 15 B, 295
- Composite systems (Factorization of), *J. C. Webber.* 11 B, 145
- Diffraction by perfectly conducting plane screens, *W. D. Montgomery.* 4 B, 275
- Laser beam self-focusing in gases, *S. Skupsky and R. K. Osborn.* 26 B, 181
- Modulation of electrons at photoemission (Quantum-mechanical), *H. Hora.* 26 B, 295
- Optical pumping as relaxation of radio-frequency transitions, *A. Di Giacomo and F. Feo.* 30 B, 193
- Particle beams at optical frequencies (Modulation and demodulation of), *E. E. Bergmann.* 14 B, 243
- Photoelectron statistics due to mixing of different types of fields, *R. Vasudevan and S. K. Srinivasan.* 8 B, 278
- Products of displaced SHO wave functions (Integrating), *E. E. Bergmann.* 22 B, 249
- Pulse propagation and superradiance, *Jeng-Yih Su.* 25 B, 59
- Pulses and multiphoton absorption probability (Incoherent and coherent), *S. Carusotto and C. Strati.* 15 B, 159
- Quantum statistics of a superradiant laser, *R. Bonifacio and M. Gronchi.* 8 B, 105
- Radiation fields with stationary independent modes (Quantum correlation functions for), *J. L. Debethune.* 12 B, 101
- Radiation statistics of a TEM₀₀ Q-switched neodymium laser (High-order multimode), *F. Sanchez.* 27 B, 305
- Refraction and power transmission (General), *W. D. Montgomery.* 15 B, 94
- Scattering of electromagnetic radiation by bound electrons (Double), *J. Kor and Vachaspati.* 1 B, 57
- Stable ultra-short optical pulses (Propagation of), *C. J. Magee.* 2 B, 208
- Stationarity, homogeneity and isotropy of the electromagnetic field in the presence of random sources, *D. Dialetis.* 10 B, 200
- Superfluorescence (Adiabatic formulae for), *V. Benza and L. A. Lugiato.* 30 B, 80
- Transfer equations for polarized light, *E. Landi Degl'Innocenti and M. Landi Degl'Innocenti.* 27 B, 134
- Ultrasonic fields on a light beam of variable width (Modulation effects of progressive), *F. Calligaris, C. Cernigoi and P. Ciuti.* 8 B, 157

5.1. Spettroscopia

- Decay of two excited atoms (Interference between different channels in the spontaneous), *F. T. Arecchi, G. P. Banfi and V. Fossati-Bellani.* 11 B, 276
- Density dependence in resonance broadening, *R. G. Breene jr.* 4 B, 1
- Effet Autler et Townes non résonnant sur une raie élargie par saturation, *B. Macke.* 8 B, 321
- Master equation approach to spontaneous emission (Symmetrized), *E. Ressayre and A. Tallet.* 21 B, 325
- Modulation resonance (Line shapes in), *A. Kopystyńska.* 3 B, 73
- Radiative and relaxation effects on line shape, *A. Di Giacomo and F. Feo.* 25 B, 730
- Spontaneous-emission feedback in a three-level quantum system: a case of conflict between semi-classical and quantum theories of radiation, *G. Oliver and O. Atabek.* 14 B, 104
- Spontaneous emission in the presence of external radiation (A quantum theory of), *R. Bose and J. A. White.* 5 B, 11

5.2. Ottica geometrica

- Goos-Hänchen and Imbert effects (Some remarks on the), *J. Zagrodzinski.* 21 B, 129

6. MECCANICA QUANTISTICA

- Accuracy in physics (Some remarks on the question of), *Y. Ronen.* 18 B, 354
- Anisotropic oscillator in a uniform magnetic field (Exact solutions of an n -dimensional), *E. E. Bergmann and A. Holz.* 7 B, 265
- Bell's theorem and world process, *H. P. Stapp.* 29 B, 270
- Bell's type inequalities sufficient conditions for local hidden-variable theories? (Are), *G. Corleo, D. Gutkowski, G. Masotto and M. V. Valdes.* 25 B, 413
- Bound-state problems (Variational methods for), *S. R. Singh and A. D. Stauffer.* 25 B, 547
- Calculus for relativistic wave equations (Graphical), *H. Birtz.* 25 B, 449
- Catastrophes in the canonical quantization

- in an expanding universe, *M. Castagnino*,
A. Verbeure and *R. A. Weder*. 26 B, 396
- Causality conditions in crystals, *B. Preziosi*.
6 B, 131
- Class of transformations leading to equivalent Hamiltonian representations of the Dirac equation (Definition of a), *J.-F. Roux* and *Phan Van Loc*. 29 B, 225
- Coherence area of high-energy electrons in the passage through a crystal (The reduction of the), *B. Ferretti*. 9 B, 399
- Coherent states in operator algebra (Use of), *P. Gluck*. 8 B, 256
- Conformal transformations and accelerations, *H. Laue*. 3 B, 55
- Correlation for Compton-scattered annihilation photons and hidden variables (Angular), *L. R. Kasday*, *J. D. Ullman* and *C. S. Wu*. 25 B, 633
- Cosine and sine operators (Simultaneous uncertainties of the), *P. M. Mathews* and *K. Eswaran*. 19 B, 99
- Coulomb scattering (A new rigorous approach to), *J. R. Taylor*. 23 B, 313
- Decay in a time-dependent external field (Spontaneous), *P. Hráskó*. 11 B, 13
- Diffusion coefficient of stochastic quantum mechanics (Derivation of the), *L. de la Peña-Auerbach* and *A. M. Cetto*.
10 B, 592
- Dirac equation in finite de Sitter space (representations of $SO_{4,1}$) (Solutions of the), *F. Riordan*. 20 B, 309
- Does God play dice? A discussion of some interpretations of quantum mechanics, *A. A. Ross-Bonney*. 30 B, 55
- Double-perturbation theory and generalized secular equations, *R. Carbó* and *R. Gallifa*.
17 B, 46
- Dynamical proper time (The nonrelativistic limit of a), *E. Papp*. 10 B, 471
- Effect of distant matter on physical observables be observed? (Can the), *T. Ohta*, *T. Kimura* and *K. Hida*. 27 B, 103
- Einstein-Podolsky-Rosen paradox (The), *R. Mirman*. 16 B, 398
- Excitations of a nonstationary asymmetrical singular oscillator, *V. V. Dodonov*, *I. A. Malkin* and *V. I. Man'ko*. 24 B, 46
- Finite Born series in potential scattering (On the use of the), *S. R. Singh*.
5 B, 1
- Galilei-invariant single-particle action, *R. G. Cowley*. 16 B, 173
- Generalized anharmonic oscillator (Summation methods for the perturbation series of the), *S. Graffi*, *V. Grecchi* and *G. Turchetti*. 4 B, 313
- Group ring of the dynamical invariance group of the hydrogen atom (The). - I, *R. Dirl*. 23 B, 417
- Group ring of the dynamical invariance group of the hydrogen atom (The). - II, *R. Dirl*. 23 B, 441
- Hamiltonian systems in relativistic dynamics, *P. Droz-Vincent*. 12 B, 1
- Harmonic oscillator with translational degrees of freedom in a magnetic field, *A. Holz* and *E. E. Bergmann*. 7 B, 277
- Hidden-variable models for quantum mechanics, *S. Gudder*. 10 B, 518
- Hidden-variable theorems (On Gudder's), *W. Ochs*. 10 B, 172
- Hyperspherical functions and quantum-mechanical three-body problem, *H. Letz*.
26 B, 522
- Identical particles (Experimental meaning of the concept of), *R. Mirman*. 18 B, 110
- Inequality stronger than Bell's inequality (An), *D. Gutkowski* and *G. Masotto*.
22 B, 121
- Interaction time evaluation (On the), *E. Papp*. 5 B, 119
- Josephson effect in the phase operator formalism (The a.c.), *M. Viano* and *F. Rocca*.
20 B, 133
- Lavoisier law and the critical point (The), *M. Cassandro* and *G. Gallavotti*. 25 B, 691
- Locality and nonlocality in the quantum theory (On some new notions concerning), *A. Baracca*, *D. J. Bohm*, *B. J. Hiley* and *A. E. G. Stuart*. 28 B, 453
- Local theories (Sufficient conditions for objective), *J. Edwards*. 29 B, 100
- Lorentz-covariant Lagrangians and causality, *P. C. Aichelburg*, *G. Ecker* and *R. U. Sexl*. 2 B, 63
- Matrix elements of the radial-angular factorized harmonic oscillator, *T. G. Haskell* and *B. G. Wybourne*. 12 B, 185
- Matrix equations of quantum mechanics (The), *S. G. Eckstein*, *B. B. Varga* and *S. Aks*. 8 B, 451
- Measurement in general quantum theory (On), *B. d'Espagnat*. 21 B, 233
- Measurement theory (Defence of a), *H. Krips*. 1 B, 23
- Nonorthogonality problem (Perturbational treatment of the), *R. Carbó* and *R. Gallifa*. 10 B, 576
- Pair annihilation at a potential barrier in time, *J. F. Walter* and *E. Marx*. 2 B, 1

- Path integral method as derived from a stochastic variational principle (The), *M. Berrondo*. 18 B, 95
- Phase-space descriptions as linear representations of operators (Generalized), *M. Schmutz*. 25 B, 337
- q -equivalent particle Hamiltonians. - II: The two-dimensional classical oscillator, *Y. Gelman* and *E. J. Saletan*. 18 B, 53
- Quantum-mechanical operators which are quadratic in momentum (The covariant form for), *F. J. Bloore* and *L. Routh*. 25 B, 78
- Quantum mechanics (A classical picture of), *N. Rosen*. 19 B, 90
- Quantum mechanics (On some experiments leading to a revision of the foundations of), *A. B. Datzeff*. 29 B, 105
- Quantum mechanics (Toward an objective interpretation of), *D. Bedford* and *D. Wang*. 26 B, 313; 29 B, 252 (E.C.)
- Quantum mechanics (Two interpretations of). - I, *D. Weingarten*. 22 B, 293
- Quantum mechanics of the rigid rotator, *J. Denmead Smith*. 22 B, 337
- Quantum systems subject to random measurements (Evolution of), *L. Fonda*, *G. C. Ghirardi* and *A. Rimini*. 18 B, 1
- Quantum theory (Interpretation of), *B. Liebowitz*. 27 B, 283
- Reinterpretation of quantum mechanics (Experimental implications of the), *P. J. Werbos*. 29 B, 169
- Relativity and quantization, *A. H. Anastassov*. 14 B, 52
- Relativity and quantization. - VII: Spatial-temporal, discrete-continual (quantum-mechanical) model of a particle, *A. H. Anastassov*. 26 B, 326
- «Secular» terms in classical and quantum mechanics (How to avoid), *M. Kummer*. 1 B, 123
- Semi-groups and the reduction process (Quantum dynamical), *G. C. Ghirardi*, *A. Rimini* and *T. Weber*. 30 B, 133
- Space-time code (Operators for the), *H. C. Morris*. 8 B, 143
- Spectral decomposition, with application to the reduced transport operator (Generalized), *L. C. Baird* and *P. F. Zweifel*. 23 B, 402
- Spinning-particle mechanics (Relativistic classical), *F. Riewe*. 8 B, 271
- Spreading of wave packets and the EPR paradox (The), *A. Z. Capri*. 27 B, 177
- Sub-Q-mechanical level and evolution, *J. G. Linhart*. 27 B, 161
- Symmetries of the positive-energy Kustanheimo-regularized Kepler problem revisited, *B. R. Sutton*. 25 B, 662
- Time scales and the problem of measurement in quantum mechanics, *L. Lanz*, *G. M. Prosperi* and *A. Sabbadini*. 2 B, 184
- Transformation de Fourier sur le groupe conforme, *P. Hillion*. 20 B, 247
- Twistor theory and quantum mechanics, *C. Oleari*. 25 B, 390
- Two-state systems and the two-sphere, *R. J. Plymen*. 13 B, 55
- Unbound motion and scattering, *J. V. Corbett*. 25 B, 103
- Universal enveloping algebra tell us about the deformations of representations? (What does the centre of the), *E. Weimar*. 15 B, 245
- Wave equation for integral spin (First-order), *A. Shamaly* and *A. Z. Capri*. 2 B, 236
- Wave operators in nonrelativistic scattering (On the existence and completeness of), *M. O'Carroll*. 8 B, 27

6.1. Teoria dei campi

- Balescu's generalized kinetic equation (On), *P. Seglar*. 30 B, 9
- Beliaev-Zelevinsky-type expansion about the Hartree-Fock minimum, *E. R. Marshalek* and *J. da Providência*. 14 B, 32
- Canonical transformations in phase space (Homogeneous): on necessary conditions for the existence of symplectic actions of simple Lie groups on differentiable manifolds, *G. Caratù*, *G. Marmo*, *A. Simoni*, *B. Vitale* and *F. Zaccaria*. 19 B, 228
- Classical renormalization (A new and consistent method for), *T. Damour*. 26 B, 157
- Combinatorics and fermion algebra, *A. M. Navon*. 16 B, 324
- Composite and unstable objects in quantum field theory (Remarks on), *W. Królikowski* and *J. Rzewuski*. 25 B, 739
- Decomposition into irreducible representations for the canonical commutation relations, *G. C. Hegerfeldt*. 4 B, 225
- Deformations into main and supplementary series, *E. Weimar*. 15 B, 272
- Deformation solution (A general first-order), *E. Weimar*. 15 B, 257
- Diagrams generated by Hamiltonians with

- the BCS topology (Cycle analysis of), *B. Stölan and L. N. Cooper.* 10 B, 291
- Dilatation and conformal invariance on null planes, *F. Rohrllich and L. Streit.* 7 B, 166
- Dimensional renormalization: the number of dimensions as a regularizing parameter, *C. G. Bollini and J. J. Giambiagi.* 12 B, 20
- Dynamics of linearized gravitation (Null co-ordinate), *C. Aragone and R. Gambini.* 18 B, 311
- Einstein-Maxwell equations (Two-parameter static and five-parameter stationary solutions of the), *G. Önengüt and M. Serdaroglu.* 27 B, 213
- Einstein-Weyl equations in general relativity (On the nonexistence of static solutions of the), *J. Wainwright.* 22 B, 131
- Energy-momentum spectra in quantum field theory (On the annihilator of), *Etang Chen.* 2 B, 161
- Gauge invariance and Galilean invariance, *S. K. Wong.* 4 B, 300
- Gauge theory in the Einstein-Cartan-Weyl space-time (On the), *M. Kasuya.* 28 B, 127
- Gel'fand-Yaglom equations for arbitrary integral spin (Finite-dimensional), *V. Amar and U. Dozzio.* 9 B, 53
- General-relativistic scalar field theory in the complex Weyl space (A), *N. H. Cherry.* 4 B, 144
- Hooke's symmetries and nonrelativistic cosmological kinematics. - II: Irreducible projective representations, *J.-G. Dubois.* 15 B, 1
- Integrals of motion for Lagrangians including higher-order derivatives, *G. C. Constantelos.* 21 B, 279
- Interaction of electromagnetic fields with matter (linear momentum basis), *B. S. Rajput.* 2 B, 45
- Magnons in a model with antiferromagnetic properties. - II, *W. Heisenberg and K. Yamazaki.* 11 B, 125
- Many-body boson problem (A new method for solving the). - I, *K. W. Wong and P. C. W. Fung.* 25 B, 595
- Many-body boson problem (New method for solving the). - II, *P. C. W. Fung, H. K. Tsang and K. W. Wong.* 28 B, 313
- Many-body systems (Continuity equations for), *N. Rivier and D. G. Pelka.* 7 B, 1
- Markov fields and examples of non-Markovian Euclidean fields (Functional characterization of), *G. C. Hegerfeldt.* 25 B, 538
- Massive gravitation (Generally covariant), *P. C. Aichelburg and R. Mansouri.* 10 B, 483
- Mercer's theorem in field theory (Application of), *C. Benard.* 16 B, 355
- Metric for conserved particles (Properties of a), *J. G. Williams.* 12 B, 58
- « One-loop skeleton model »: the equation of state of a scalar field near the critical point, *W. Bouchè, F. de Pasquale and P. Tombesi.* 26 B, 129
- Orbital and vortical motion in the Kerr metric, *F. De Felice and M. Calvani.* 10 B, 447
- Oscillation theory of the classical problem of a particle in interaction with a scalar field. Application to the polaron model (A finite-amplitude). - I: An exact particular solution. Remarks on the origin of the divergences of the small-oscillation and perturbation results, *R. Evrard, J. Devreese, E. Kartheuser and C. C. Grosjean.* 12 B, 118
- Oscillation theory of the classical problem of a particle in interaction with a scalar field. Application to the polaron model (A finite-amplitude). - II: A general approximate solution. Semi-classical treatment, *J. Devreese, R. Evrard, E. Kartheuser and C. C. Grosjean.* 12 B, 137

- Photon retinue and infra-red divergence problem in quantum electrodynamics,

- C. C. Chiang and E. C. G. Sudarshan.* 17 B, 13
- Radiative corrections to atomic levels (A natural approach to the theory of the), *C. Tzara.* 22 B, 215
- Spin-orbit coupling (On), *G. Beck and N. Davidovich.* 27 B, 19
- Superheavy elements and nonlinear electrodynamics, *J. Rafelski, W. Greiner and L. P. Fulcher.* 13 B, 135
- Wiener-Khintchine theorem for electromagnetic fields (New formulation of the quantum-mechanical analogue of the), *S. Carusotto.* 8 B, 289
- 6.5. Relazioni di dispersione**
- k -dependent Lagrangian and dispersion relation in vacuum electrodynamics, *A. Holz.* 10 B, 411
- Relations de dispersion pour les phénomènes non linéaires d'ordre 2, *F. Smet et P. Smet.* 20 B, 273
- 6.6. Interazioni**
- Canonical transformations and quadratic Hamiltonians, *D. G. Currie and E. J. Saletan.* 9 B, 143
- Causality and the spontaneous break-down of conformal symmetry, *H. Lauve.* 10 B, 283
- Configuration space constraints as projectors in the many-body system, *C. Marcio do Amaral.* 25 B, 817
- Coulomb scattering (Approximate description of), *P. Lu.* 1 B, 65
- Hamiltonian interactions (Motions of relativistic), *R. Arens.* 21 B, 395
- Impact parameter operator (A quantum-mechanical), *S. C. McDonald.* 9 B, 111
- Interaction of n -dimensional soliton wave fronts (The), *J. D. Gibbon and G. Zambotti.* 28 B, 1
- Kernels realizing associative multiplications between phase-space functions (On), *A. Simoni, F. Zaccaria and E. C. G. Sudarshan.* 5 B, 134
- Local potentials (The Born approximation for), *A. E. A. Warburton and R. W. Hatfield.* 12 B, 72
- Mellin-transformation method for nonpolynomial interactions, *J. C. Houard and M. Irac-Astaud.* 8 B, 461
- Octonions and isospin, *R. Penney.* 3 B, 95
- Oscillator in cylindrical co-ordinates (A relativistic equivalent), *N. V. V. J. Swamy and E. F. Chaffin.* 25 B, 28
- Phase integral approximations of arbitrary order (On modifications of), *N. Fröman and P. O. Fröman.* 20 B, 121
- Quantum harmonic oscillator (Semi-coherent states of the), *P. M. Mathews and K. Eswaran.* 17 B, 332
- Relativistic bound states and cross-sections, *J. F. Walter and E. Marx.* 3 B, 119
- Relativistic dynamical algebras for two-particle systems, *A. Sudbery.* 9 B, 299
- Scattering (Least-squares technique for), *K. Ladányi and T. Szondy.* 5 B, 70
- Scattering by a dipole and by a neutral system of two fixed charges (Nonrelativistic classical and quantum), *R. F. Alvarez-Estrada and M. E. Villalón.* 27 B, 79
- Scattering theory with dissipative interactions and time delay, *Ph. A. Martin.* 30 B, 217
- S -matrix (Continuity of the), *H. Narnhofer.* 30 B, 254
- Tachyons in a gravitational field, *R. O. Hettel and T. M. Hellwells.* 13 B, 82
- Time-dependent scattering theory for long-range interactions (On), *E. Prugovečki.* 4 B, 105
- Transparent potentials (Short-range), *M. Razavy.* 18 B, 237
- Variational methods in scattering theory (A unified formulation of the), *S. R. Singh and A. D. Stauffer.* 22 B, 139
- Wave and transition operators in nonrelativistic scattering theory (Integral representations of the), *E. Prugovečki.* 4 B, 124
- WKB approximation with a singular potential (On the conventional and modified), *Cao-xuan-Chuan and Hó-van-Hoà.* 24 B, 141
- 7. FISICA NUCLEARE**
- Approximant and Coulomb distortion (Low-energy), *A. Bottino and G. Ciocchetti.* 17 B, 275
- Elastic-scattering theory of fast positively charged particles by the crystallographic plane (The), *N. P. Kalashnikov.* 29 B, 1
- Interaction time measurement and causality, *E. Papp.* 10 B, 69

Muonic hydrogen (On the metastability of the $2s$ state of), *G. Kodosky* and *M. Leon*.
1 B, 41

Scattering of fast positively charged particles by the atomic row in a single crystal (Elastic), *N. P. Kalashnikov* and *M. N. Strikhanov*.
29 B, 9

7.1. Particelle elementari

Information content of production models, *G. Camisassa*, *P. Frè* and *L. Sertorio*.
30 B, 364

Methods for using experimental data to estimate functions (Some), *S. Yellin*.
26 B, 191

Pulse spectrum of a plastic scintillator at sea level (The anomalous), *A. K. De*, *M. Nath*, *S. Mitra*, *D. P. Bhattacharyya*, *P. Ghogh*, *A. K. Das* and *P. C. Bhattacharya*.
3 B, 114

Spinor equivalents of irreducible tensors under the special Lorentz group, *E. Massa*.
9 B, 41

Vector-meson contributions to N^*-N OBEP, *E. Rochleder*, *A. Gersten* and *A. E. S. Green*.
6 B, 89

7.2. Mesoni

Pionic atom in the theory of the generalized gravitation potential (The), *N. H. Cherry*.
3 B, 183

7.3. Mesoni leggeri

Muon energy losses and range straggling in the $10 < E < 10^5$ GeV region, *L. Bergamasco* and *P. Picchi*.
3 B, 134

Muon state of the electron-muon mass doublet (On the lifetime of the), *M. Sachs*.
10 B, 339

7.4. Mesoni pesanti

7.5. Fotoni - Raggi gamma - Raggi X

Asymmetry ratio of pairs produced by circularly polarized photons (On the influence of the limits of the angles on the), *J. Proriot*.
19 B, 208

Bremsstrahlung spectrum (About the high-

frequency limit of the), *J. Proriot*.

19 B, 211

Coulomb correction in bremsstrahlung and pair production processes (On a method to improve the calculation of the), *J. Proriot* and *G. Roche*.
19 B, 221

L -shell photoelectric cross-sections for heavy atoms at 145 and 279 keV, *M. I. Singh* and *B. S. Sood*.
8 B, 261

Response of the harmonic and anharmonic oscillator to X-rays (Nonlinear), *I. Freund* and *B. F. Levine*.
20 B, 64

X-ray absorption edges and effective nuclear charge (Chemical shifts in). A correlation, *U. C. Srivastava*.
11 B, 68

7.6. Elettroni

7.7. Neutrini - Iperoni - Nucleoni

Neutrino archaeology. The simulation of double beta-decay by solar neutrinos, *G. Bozoki* and *K. Lande*.
12 B, 65

Neutrino sea as a subquantum medium (Proposed experimental test of), *H. C. Dudley*.
4 B, 68; 6 B, 88 (E.C.)

7.8. Protoni

Proton-proton reaction at high energies (The), *C. L. Sarazin*.
26 B, 94

7.9. Neutroni

Coherence properties of a thermal neutron beam (Further remarks on the), *S. Boffi* and *G. Caglioti*.
3 B, 262

Neutron diffraction by ideally curved crystals (Dynamical), *B. Klar* and *F. Rustichelli*.
13 B, 249; 15 B, 320 (E.C.)

Neutron radiative-capture cross-sections for « s -process » calculations in stars, *V. Benzi*, *R. D'Orazi* and *G. Reffo*.
13 B, 226

Scattering of neutrons in liquid gallium (Multiple), *M. Antonini* and *M. Corchia*.
10 B, 117

Thermal neutrons. Distribution of lifetimes, *F. Goded*.
4 B, 73

7.10. Deuteroni

7.11. Particelle alfa - Nuclei di He

7.12. *Raggi cosmici*

- Antiproton spectrum in cosmic rays, *M. C. Chen*. 8 B, 343
- Attenuation length for high-energy γ -rays in the relic radiation (The), *M. C. Allcock and J. Wdowczyk*. 9 B, 315
- Čerenkov light in $(10^{11} \div 10^{12})$ eV EAS: time dependence of the isophotes and multiple pulses, *C. Castagnoli, P. Picchi and M. A. Locci*. 9 B, 213
- Čerenkov pulses of EAS (Experimental results on the), *G. Bosia, C. Castagnoli, G. Marangoni, G. Navarra, G. Raspolini and O. Saavedra*. 9 B, 177
- Čerenkov radiation in extensive air showers (New studies of), *J. E. Grindlay*. 2 B, 119
- Charge ratio and the momentum spectrum of cosmic-ray muons at large zenith angles in the range $(20 \div 1000)$ GeV/c (Measurements of the), *S. Iida*. 26 B, 559
- Cosmic-ray diurnal anisotropy (Long-term variation in the), *N. Iucci and M. Storini*. 13 B, 361
- Cosmic-ray muon intensity at sea level (The absolute vertical), *F. Ashton, K. Tsuji and W. Wolfendale*. 9 B, 344
- Cosmic-ray muons in the vertical and greatly inclined directions at geomagnetic latitudes 16° N (Measurements of absolute intensities of), *N. L. Karmakar, A. Paul and N. Chaudhuri*. 17 B, 173
- Cosmic rays (The aeonic flux of ultra-energetic), *L. G. Van Loon*. 14 B, 267
- Cosmic-ray single-muon flux at 3.6 GeV and a measurement of the showerless penetrating particle-pair flux above 3.6 GeV (Measurement of the absolute vertical integral and differential), *A. S. Kanofsky and P. C. Colter*. 17 B, 219
- Cosmic rays in the atmosphere (Angular effects in the propagation of), *J. J. Torsti and R. W. Terho*. 16 B, 376
- Cosmic-ray spectra and Hagedorn's thermodynamic model, *J. J. Torsti*. 25 B, 829
- Cosmic-ray spectral modulation above 2 GV during the descending phase of solar cycle number 19 (The). - I: A comprehensive treatment of the neutron monitor data from the worldwide station network and latitude surveys, *F. Bachelet, N. Iucci, G. Villoresi and B. Sporre*. 7 B, 17
- Cosmic-ray spectral modulation above 2 GV during the descending phase of solar cycle number 19 (The). - II: A study of large Forbush decreases, *F. Bachelet, N. Iucci and G. Villoresi*. 7 B, 34
- Cosmic-ray spectral modulation above 2 GV during the descending phase of solar cycle number 19 (The). - III: A study of the long-term variation, *F. Bachelet, N. Iucci and G. Villoresi*. 7 B, 45
- Cosmic-ray spectral modulation above 2 GV (The). - IV: The influence on the attenuation coefficient of the nucleonic component, *F. Bachelet, N. Iucci, G. Villoresi and N. Zangrilli*. 11 B, 1
- Cosmic-ray spectral modulation above 2 GV during the descending phase of solar cycle No. 19 (The). - V: The influence on the coupling functions of the nucleonic component, *F. Bachelet, N. Iucci, M. Parisi and G. Villoresi*. 18 B, 258
- Deuterons at 6 m w.e. underground (Flux of medium-energy), *C. R. Alcock, M. Tyn-del and P. C. M. Yock*. 22 B, 43
- Diffusion processes of cosmic rays with energies between 2 and 20 GV during Forbush decreases: the diurnal effect, *E. Bussolletti and A. Geranios*. 11 B, 53
- Diurnal effect of the cosmic rays during the period 15 October 1965 - 30 June 1966 (The). - I: Method of analysis and statistical distribution, *E. Bussolletti, N. Iucci and G. Villoresi*. 10 B, 43
- Diurnal effect of the cosmic rays during the period 15 October 1965 - 30 June 1966 (The). - II: The equatorial cosmic-ray anisotropy and the interplanetary magnetic field, *E. Bussolletti and N. Iucci*. 10 B, 56
- Energy spectrum of near vertical muons above $3 \cdot 10^{11}$ eV (An analysis of the), *L. K. Ng and A. W. Wolfendale*. 20 B, 161
- Extensive air showers and primary cosmic-ray spectrum (Size spectra of), *Y. C. Saxena*. 17 B, 53
- Forbush decreases and interplanetary disturbances, *A. M. Conforto*. 17 B, 300
- Geometry effects in the detection of Čerenkov light from extensive air showers (Analysis of), *G. Bosia, M. Maringelli and G. Navarra*. 9 B, 201
- Latitude, altitude and primary modulation effects on the multiplicity distribution in the NM-64 neutron monitors, *N. Iucci, M. Storini, G. Villoresi and W. K. Griffiths*. 6 B, 111; 8 B, 283 (E.C.),
- Muon flux at sea level up to 8 TeV derived

- from the observed burst size spectrum (The high-energy), *S. Chin, Y. Hanayama, T. Hara, S. Higashi, T. Kitamura, S. Mio-no, M. Nakagawa, S. Ozaki, T. Takahashi, K. Tsuji, Y. Watase, K. Kobayakawa and H. Shibata.* 4 B, 177
- Muon flux between 0.76 GeV/c and 1.25 GeV/c (Mesurement of the absolute vertical), *L. K. Ng, M. G. Thompson and M. R. Whalley.* 22 B, 328
- Muon intensities underground ($(50 \div 4300)$ m w.e.) and the s.l. energy spectrum, *L. Bergamasco, B. D'Ettore Piazzoli and P. Picchi.* 4 B, 59
- Muons in inclined showers (Abundance and lateral distribution of), *M. Dardo, L. Briatore and K. Sitte.* 14 B, 15
- Muons in the Mont Blanc tunnel (High-energy atmospheric), *K. Maeda.* 13 B, 201
- Muon spectra at zenith angles 45° W and 60° W near the geomagnetic equator in the momentum range $(0.4 \div 3)$ GeV/c (Absolute sea-level integral), *Debaprasad Bhattacharyya.* 24 B, 78
- North-South anisotropy and the cosmic-ray radial gradient in the vicinity of the Earth (The), *N. Iucci and M. Storini.* 10 B, 325
- Oscillation in the cosmic-ray intensity and shorter periodicities (27-day), *G. Lovera and C. Oldano.* 2 B, 28
- Solar modulation of galactic protons, He nuclei and electrons during 1965-1968, *S. Cecchini, I. Guidi and N. J. Martinic.* 22 B, 237
- Spectrum of surviving primary protons with energies $(3 \div 30)$ TeV at 5200 m a.s.l. and the cross-section for proton-air-nucleus collisions (Energy), *C. Aguirre, A. Trepp, G. R. Mejia, K. Murakami, K. Kamata, Y. Toyoda, T. Maeda, C. Yokoyama, P. K. MacKeown, K. Suga, K. Uchino and T. Kaneko.* 27 B, 263
- Stopping particles underground, *C. Grupen, A. W. Wolfendale and E. C. M. Young.* 10 B, 144
- 7.13. Nuclei**
- Hyperspherical functions and quantum-mechanical three-body problem with application to carbon 12, *H. Letz.* 30 B, 348
- 7.14. Reazioni nucleari**
- Channeling of high-energy protons in Si and W, *E. Acerbi, C. Birattari, B. Candoni, M. Castiglioni and C. Succi.* 29 B, 257
- 7.15. Decadimento - Radioattività**
- Fission fragments in light solid materials (Range of), *F. Demichelis, R. Liscia and A. Tartaglia.* 10 B, 523
- Nature of 10^{-8} s and 10^{-7} s lifetimes in Al_2O_3 , *P. Sen and C. Sen.* 29 B, 124
- 7.16. Iperframmenti**
- 8. FISICA ATOMICA E MOLECOLARE**
- Coefficients connecting the Stark and free-field wave functions for the hydrogen atom (A note on the), *R. G. Kulkarni.* 12 B, 215
- Compound atom state in neon (A). Bound-state calculation of resonance energy, *C. Foglia.* 10 B, 348
- Cross-sections for $\text{Na}^* + \text{K}$ electronic transfer (Measured), *M. Allegrini, G. Alzetta, L. Moi and D. Giulietti.* 28 B, 69
- Diamagnetic susceptibility and orbital momentum of inert-gas atoms (Free-electron gas exchange correlation on the calculated results for), *M. L. Siqueira and J. R. Leite.* 14 B, 284
- Dispersion and absorption of sound in monoatomic rarefied gases (Some remarks about), *M. Carrassi and A. Morro.* 13 B, 281
- Dispersion energy of atoms and molecules (A semi-classical theory of the), *J. Mahanty.* 22 B, 110
- Gaussians for N -particle systems where $L=0$, $P=+$ (Generalized nonadiabatic), *H. Almström.* 26 B, 279
- Hartree-Fock method (Limitations and validity of the), *L. Pietronero and F. Zirilli.* 24 B, 57
- $(\mu^4\text{He})_{2s}^+$ metastable system in helium gas (Experimental study on the), *A. Bertin, G. Carboni, A. Placci, E. Zavattini, U. Gastaldi, G. Gorini, G. Neri, O. Pitzurra, E. Polacco, G. Torelli, A. Vitale, J. Duclos and J. Picard.* 26 B, 433

Quenching of the metastable muonic-helium ion $\mu\text{He}^+(2S)$ (Radiative collisional), *G. Carboni* and *O. Pitzurra*. 25 B, 367

Radiation in a modulation resonance experiment on the 6^3P_1 -state of mercury (Coherent diffusion of), *A. Kopystyńska*. 8 B, 442

Rigid rotator (The quantum theory of the three-dimensional), *O. Malo*. 21 B, 162

Scattering factors using analytic solutions of the TF and the TFD equations, *A. Jain* and *R. Srivastava*. 27 B, 249

Stark effect for hydrogen (Algebraic treatment of the), *A. Romero Lopes* and *P. Leal Ferreira*. 3 B, 23

Two-level atom (Green's function treatment of a): effect of a ground-state-electromagnetic-field interaction, *G. C. Duncan*. 18 B, 41

Wave functions and expectation values of selected many-electron atoms in a model-potential treatment (Investigations on), *P. Cavaliere*, *G. Ferrante* and *R. Geracitano*. 9 B, 96

8.1. Molecole

Absorption of gases at high pressures (Rotational), *G. Buffa*, *O. Tarrini* and *A. Di Giacomo*. 20 B, 281

Bremsstrahlung from electron-polar-molecule collisions, *M. S. Sodha*, *B. P. Pal* and *A. K. Ghatak*. 20 B, 262

Multiphoton excitations in vibrational-rotational states of diatomic molecules in an intense electromagnetic field, *F. H. M. Faisal* and *N. K. Rahman*. 13 B, 114

Positronium molecule (A model of a), *C. Treccia Hill*. 10 B, 511

Structure of TCNQ molecule by self-consistent statistical-exchange multiple-scattering method (Calculation of electronic), *F. Herman* and *I. P. Batra*. 23 B, 282

Variational determination of molecular hyperpolarizabilities (A), *E. Leuliette-Devin* and *R. Locqueneux*. 29 B, 18

8.2. Ionizzazione

Atomic ionization by intense laser fields, *R. K. Osborn*. 9 B, 414

Cross-section for the inner-shell ionization of medium-heavy atoms by the electrons (Differential), *J. N. Das*. 12 B, 197

8.3. Plasma

Bremsstrahlung in a plasma under the influence of a strong magnetic field, *J. Virtamo* and *P. Jauho*. 26 B, 537

Charge injection for ion extraction (A plea for), *N. K. Majumdar*. 29 B, 178

Conductivity tensor of a collisional plasma in a magnetic field, *J. M. Midha* and *S. C. Gupta*. 16 B, 352

Collective effects in an electron gas. - II, *R. Sridhar*. 10 B, 36

Current rise and thermal instability in an expanding Tokamak discharge, *L. Enriques* and *F. Santini*. 25 B, 842

Drift velocity of electrons in a gas where the electron energy loss per collision is large, *A. Gilardini*. 27 B, 59

Electron gas (Collective effects in an). A study in de Haas-van Alphen oscillations, *R. Pratap*, *R. Vasudevan* and *R. Sridhar*. 8 B, 223

Electron gas (Collective effects in an). - IV: Low temperature: low- and high-magnetic-field limits, *R. Pratap*. 19 B, 29

Electron gas (Collective effects in an). - V: High temperature: low- and high-magnetic-field limits, *R. Pratap*. 19 B, 44

Electron interaction energy (Self-consistent field calculation of), *J. T. Anderson*. 1 B, 100

Electron plasma (On instabilities in a rotating), *B. Kjellmert*. 13 B, 379; 16 B, 264 (E.C.)

Electron plasma with self-consistent field interaction (Variational and statistical methods for an), *H. E. Wilhelm* and *S. H. Kim*. 8 B, 307

Electron temperature and density in a plasma by Thomson scattering of laser light (An apparatus for the space- and time-resolved measurement of), *S. E. Segre* and *M. Martone*. 3 B, 45

Electrostatic waves near the electron cyclotron harmonics, *M. Bagliani*, *M. Fontanesi* and *G. Ramponi*. 26 B, 31

Flow in an electrically conducting two-phase fluid under transverse magnetic fields (Unsteady slip), *L. Debnath* and *U. Basu*. 28 B, 349

Flute modes in a plasma in the presence of nonuniform electric fields, *L. Carenza* and *F. Engelmann*. 10 B, 127

Grad's solution of the Boltzmann equation in terms of irreducible spherical tensors

- and Talmi coefficients (The), *J. M. Midha* and *S. C. Gupta*. 7 B, 185
- Hall currents and collisions with neutrals on the dynamic stability of a composite hydromagnetic plasma (Effects of), *P. K. Bhatia* and *P. D. Ariel*. 12 B, 27
- Interactions in real plasmas and in the « plasmas » of numerical experiments (Basic), *A. Sestero*. 9 B, 222
- Kinetic theory for plasma in strong electromagnetic fields (Stochastic). - II: Friction and diffusion terms, *C. Masselot* and *G. di Bona*. 18 B, 131
- Larmor radius on thermal instability of a plasma (Effect of finite), *R. C. Sharma*. 20 B, 303
- Linear wave conversion (Coupled equations in the theory of), *I. Fidone*. 5 B, 219
- MHD equilibrium equation for an axially symmetric free-boundary plasma in a torus with arbitrary cross-section (Numerical solution of the), *G. Cenacchi*, *A. Taroni* and *A. Sestero*. 25 B, 279
- Modes électromagnétiques pour une incidence oblique dans un plasma magnétisé et inhomogène (Propagation des), *M. Fichet* et *I. Fidone*. 16 B, 221
- Pair correlations and dielectric response in a plasma (Self-consistent), *M. C. Abramo* and *M. P. Tosi*. 10 B, 21
- Particle correlations in a classical one-component plasma, *M. C. Abramo* and *M. P. Tosi*. 21 B, 363
- Plasma in the presence of Hall currents (Hydromagnetic stability of a composite), *P. K. Bhatia* and *P. N. Gupta*. 17 B, 203
- Plasma low-frequency stability (Effects of nonuniform radial electric fields on), *G. Bardotti* and *M. Dobrowolny*. 6 B, 139
- Plasma waves in the presence of electron beams (Nonlinear interactions of), *J. Pal* and *K. M. Srivastava*. 20 B, 9
- Propagation of electromagnetic waves in a compensated magnetoplasma (Oblique), *P. Halevi* and *M. A. Hobart R.* 25 B, 581
- Propagation of MHD shock waves into regions of various uniform densities, *S. Chandra* and *K. M. Srivastava*. 27 B, 41
- Rayleigh-Taylor instability of a plasma in the presence of a vertical magnetic field (Effect of finite Larmor radius on), *P. D. Ariel*. 6 B, 124
- Rayleigh-Taylor instability of a viscous plasma in the presence of Hall current, *K. Abani* and *K. M. Srivastava*. 26 B, 419
- Resistivity in a turbulent plasma confined in a strong magnetic field (Theoretical features of anomalous), *M. Dobrowolny* and *F. Santini*. 22 B, 181
- Resonance in an inhomogeneous cold and collisionless plasma slab (Lower hybrid), *E. Lazzaro* and *C. Maroli*. 16 B, 44
- Response of an electron liquid (Nonlinear electromagnetic), *M. Baldo*. 27 B, 121
- Rogowski coil as a quantitative probe for current density measurements in a linear pinch (On), *F. Piperno* and *G. Solaini*. 29 B, 239
- Shock observations in a continuous supersonic plasma wind tunnel, *C. Bartoli* and *M. Bitter*. 5 B, 95
- Shocks in magnetogasdynamic homothermal flows (Strong cylindrical), *B. G. Verma*. 20 B, 203
- Single-particle radiation near electron cyclotron harmonics, *E. Crosignani*, *G. Siracusa* and *G. Zambotti*. 5 B, 83
- Solutions of nonlinear wave-wave interacting systems (Explosive ray), *P. K. C. Wang*. 28 B, 56
- Statistical mechanics of magneto-active plasma, *R. Pratap* and *R. Sridhar*. 9 B, 279
- Statistical mechanics of quadratic response functions of classical plasmas (The), *K. I. Golden* and *M. B. Silevitch*. 4 B, 27
- Thomson-scattering apparatus for the Alcator device (The 90°), *U. Ascoli-Bartoli*, *A. Brusadin*, *A. Cecchini*, *A. De Angelis*, *F. Garosi*, *E. Grilli*, *R. Marchetti*, *R. Marchonero*, *L. Pieroni* and *S. E. Segre*. 30 B, 87
- Transport coefficients of fully ionized plasma, *J. M. Midha* and *S. C. Gupta*. 18 B, 123
- Transverse waves and instabilities in a uniform plasma for propagation along the magnetic field, *A. Sestero* and *M. Curatolo*. 5 B, 165
- Wave-plasma interaction (Stochastic kinetic theory of strong). - I: Kinetic equations, *G. Di Bona* and *C. Masselot*. 12 B, 256
- Wave propagation in resonance regime (Cold), *A. Airolidi Crescentini* and *C. Maroli*. 25 B, 85
- Velocity nonuniformity between heavy particles in a MPD thruster (A theoretical model of), *F. Piperno* and *M. Strani*. 26 B, 409

8.4. Teoria del calore

9. FLUIDI

- Bose-Einstein condensate in superfluid ^4He (A theoretical argument against a), *W. A. B. Evans*. 30 B, 145
- Boundary layer flow in non-Newtonian power law fluids (Laminar), *S. A. S. Messiha*. 21 B, 271
- Correlations in model liquids (Triplet), *G. Cubiotti, E. Donato, E. S. Giuliano, R. Ruggeri and A. Villari*. 29 B, 79
- Critical layer (The «irregular»), *R. Lupini and C. Pellacani*. 29 B, 39
- Evolution equation describing the unidimensional motion of a viscous fluid (On a nonlinear), *P. de Mottoni and E. Salusti*. 16 B, 127
- Flow induced by torsional oscillations of a disk (On the unsteady non-Newtonian rotating), *L. Debnath and U. Basu*. 27 B, 181; 28 B, 304 (Addendum)
- Flow through a straight channel with porous walls in the presence of magnetic field and its solution (Unsteady viscous compressible), *R. S. L. Srivastava and L. M. Srivastava*. 22 B, 13
- General-relativistic thermodynamics (Kinetic derivation of nonstationary), *M. Kravnyš*. 8 B, 417
- Heat transfer in hydromagnetic boundary layer over a flat plate, *S. K. D. Shah and J. L. Bansal*. 18 B, 333
- Hydrodynamics and boundary conditions (Higher-order). Application to the thermal force, *H. Vestner, M. Kübel and L. Waldmann*. 25 B, 405
- Hydromagnetic boundary layer flow induced by torsional oscillations of a disk (On the unsteady), *L. Debnath*. 25 B, 711
- Next-neighbour distributions in simple liquids, *S. Franchetti*. 10 B, 211
- Oscillations of a cylinder in a viscous compressible liquid (Transversal), *M. Gitterman*. 25 B, 328
- Partial structure factors in liquid mixtures (Concentration dependence of), *M. Parrinello and M. P. Tosi*. 25 B, 242
- Radiation pressure of thermal waves in liquids: a direct measurement, *G. Brescia, E. Grossetti and F. S. Gaeta*. 8 B, 329
- Self-diffusion coefficient in dense-fluid region, *F. P. Ricci, M. A. Ricci and D. Rocca*. 28 B, 287
- Shock wave due to an explosion at the boundary of a half-space containing a perfect gas (Uniform propagation of a), *P. Singh*. 15 B, 33
- Thermodynamic properties of a Bose fluid (Variational model for the), *C. De Michelis and L. Reatto*. 7 B, 145
- Transport coefficients near a critical point in multicomponent fluid systems, *L. Mistura*. 12 B, 35
- Turbulent Ekman boundary layer flow (A re-examination of the classical formulation of), *R. Lupini, A. Speranza and A. Trevisan*. 25 B, 871
- Viscosity near a critical point in multicomponent systems (Anomalous shear), *L. Mistura and P. Tartaglia*. 19 B, 181
- Viscous-fluid reaction to a torsionally oscillating spheroid: linearized steady-state spheroidal function solution, *D. R. Tompkins jr.* 21 B, 36
- Viscous-fluid reaction to a torsionally oscillating spheroid: linearized steady-state weak-separation solution, *D. R. Tompkins jr.* 21 B, 47
- Vortex rings in superfluid helium (Proper analysis of experiments on quantized, charged), *K. W. Wong and W. Meyer*. 11 B, 155

9.1. Proprietà magnetiche ed elettriche dei fluidi

- Boltzmann equation for a Maxwell-Lorentz gas in an electric field (Rigorous analysis of the solution of the), *G. L. Braglia and L. Ferrari*. 7 B, 119
- Electron speed distribution functions in an electric field in a gas (Time-dependent). - I: «Stazionarization» in Ar, Kr and Xe, *G. L. Braglia and L. Ferrari*. 4 B, 245
- Electron speed distribution functions in an electric field in a gas (Time-dependent). - II: Gas temperature effects, *G. L. Braglia and L. Ferrari*. 4 B, 262
- Hall current on the instability of an inviscid stratified fluid (Effect of), *K. Abani and K. M. Srivastava*. 24 B, 33
- Light scattering from a Fermi liquid, *A. R. Vasconcellos and R. Luzzi*. 23 B, 335
- Motion of electrons in an electric field in a gas (A study of the), *G. L. Braglia*. 8 B, 478 (E.C.)
- Rayleigh-Taylor instabilities of a plane circular interface (Electrohydrodynamic), *Abou El Magd A. Mohamed and N. K. Nayyar*. 16 B, 285

- Rayleigh-Taylor instability of two viscous superposed conducting fluids, *P. K. Bhatia*. 19 B, 161
- Speed distributions of electrons in a field in a gas (Time-dependent). Notes on the preservation of the «delta» form, *G. L. Braglia*. 25 B, 479
- «Stationarization» of the velocity distribution function of electrons in a gas in an electric field, *G. L. Braglia and L. Ferrari*. 2 B, 254 (E.C.)
- ## 10. FISICA DELLO STATO SOLIDO
- Acoustic absorption and electron-phonon interaction in CdSe, *S. Ballarò, M. Cutroni and F. Wanderlingh*. 27 B, 51
- Alkali halides on the ultrasonic absorption in D₂O and H₂O (Effect of), *S. K. Kor, O. N. Awasthi, Gulshan Rai and S. C. Deorani*. 8 B, 358
- Annihilation radiation in metals with a Ge(Li) detector (Study of Doppler-broadened), *F. Alfano, T. Reynolds and M. K. Ramaswamy*. 10 B, 334
- Annihilation radiations in some metals (Doppler-broadened), *P. Sen, A. P. Patro and M. Rama Rao*. 17 B, 212
- Atomic level splitting by external fields, *L. Basano and R. Cenni*. 22 B, 261
- Atomic motions and the radial distribution function for simple solids in the harmonic approximation (Correlations of), *S. Franchetti*. 26 B, 493
- Band structure calculation of semiconductors and alloys with diamond and zinc-blende-crystal lattices, *E. V. Anda and N. Majlis*. 15 B, 225
- Band structure of alkali halides (Pseudopotential approach to the), *F. Bassani and E. S. Giuliano*. 8 B, 193
- Band structure of lithium, sodium and potassium fluorides (Electronic), *C. Jouanin, J. P. Albert and C. Gout*. 28 B, 483
- Band structure of zinc (Effect of correlation on the), *F. Borghese and P. Denti*. 20 B, 236
- Band structure of zinc and cadmium (Effects of exchange on the), *F. Borghese and P. Denti*. 3 B, 34
- Behaviour of ⁴He above the lambda point (A field-theoretic model for the critical), *F. de Pasquale and P. Tombesi*. 12 B, 43
- Beryllium and titanium by Green's function method (Electronic structure of), *V. V. Bhokare and M. Yussouff*. 19 B, 149
- Binary alloys (Atomic-size effect in), *A. Magnaterra and F. Mezzetti*. 24 B, 135
- Bloch electrons in crossed electric and magnetic fields: a perturbation approach, *J. S. Godley and S. P. Morris*. 4 B, 341
- Bloch functions (Magnetic), *F. Bentosela*. 16 B, 115
- Boson method in superconductivity (The): application to the study of the Josephson effect, *L. Leplae, F. Mancini and H. Umezawa*. 9 B, 233
- Bound states of two polaritons (On the problem of), *B. S. Tošić, G. S. Davidović-Ristovski and Lj. M. Ristovski*. 25 B, 216
- Cadmium centres in cesium and rubidium halides, *S. Radhakrishna and R. Narayanan*. 14 B, 203
- Carbide precipitation on the grain boundary internal-friction peak of austenitic steels (On the effect of), *A. Ferro, G. Fratucello and F. Mezzetti*. 8 B, 183
- Carrier injection in semiconductors: pre-break-down electrical conduction theory, *F. Cerrina, G. Margaritondo, P. Migliorato, P. Perfetti and E. Salusti*. 27 B, 229
- Charge decay characteristics of PVC (SR₁₁), *P. K. C. Pillai, K. Jain and V. K. Jain*. 3 B, 225
- Charge transfer in binary alloys, *A. Magnaterra and F. Mezzetti*. 6 B, 206
- Collective modes, coupling constants and dynamical-symmetry rearrangement in superconductivity, *S. Cremer, M. Sapiro and D. Lurié*. 6 B, 179
- Conductivity and electron-phonon interaction in CdS (Residual), *G. Carini jr., G. Galli and F. Wanderlingh*. 18 B, 363
- Conductivity in CdSe (On the behaviour of residual), *G. Carini jr., G. Galli and F. Wanderlingh*. 27 B, 65
- Core annihilation rates of positrons in rare-earth metals, *K. P. Joshi, S. B. Shrivastava and V. S. Dubey*. 27 B, 245
- Correlation properties of a positron in an electron liquid. Theory and applications, *M. Baldo and R. Pucci*. 23 B, 202
- Correlations and sum rules for a Fermi liquid (Spatial), *A. Sjölander*. 23 B, 124
- Crystal dynamics of solidified xenon (Effect of angular forces on the), *S. Jogi, B. B. Tripathi and J. Behari*. 10 B, 111
- Crystal potentials in band structure calculations (Correlated), *U. von Barth and L. Hedin*. 23 B, 1

- Current saturation in CdS (Multistep), *S. Ballarò, M. Cutroni, G. Galli and F. Wanderingh.* 11 B, 117
- Debye-Waller factors of face-centred cubic metals, *S. Chandra, H. L. Kharoo and M. P. Hemkar.* 30 B, 1
- de Launay model for the lattice dynamics of h.c.p. metals (Extended), *R. Cavalheiro and M. M. Shukla.* 30 B, 163
- de Launay's model for lattice dynamics of face-centred-cubic metals (Extended), *M. M. Shukla and R. Cavalheiro.* 16 B, 63
- d electron contribution to the positron annihilation in transition metals (On the), *S. B. Shrivastava, K. P. Joshi and V. S. Dubey.* 27 B, 240
- Density matrix of a ferromagnetic system of spins 1 (A first-order approximation for the), *A. Hengeltraub and N. J. Parada.* 28 B, 18
- Density-of-states tails associated with the *L*-minima of the conduction band of heavily doped *n*-GaSb, *A. K. Bhattacharjee and S. Rodriguez.* 13 B, 300
- Density oscillations and density response in systems with nonuniform electron density, *G. Mukhopadhyay and S. Lundqvist.* 27 B, 1
- Depolarization current characteristics of PVA thermoelectrets, *P. K. C. Pillai, K. Jain and V. K. Jain.* 28 B, 152
- Dipolar interaction on the spin wave amplification (Effect of the), *S. Coutinho and L. C. M. Miranda.* 28 B, 161
- Dislocation energy levels in germanium (Overlapping phenomena and), *P. Gondi, S. Mantovani and F. Schintu.* 2 B, 9
- Dislocation relaxation in molybdenum, *M. Mongy.* 8 B, 247
- Dispersion of phonon waves in platinum and thorium, *R. Cavalheiro and M. M. Shukla.* 26 B, 220
- Domain-domain interactions by the propagation of magnetization changes (Investigation on the), *A. Cecchetti and G. Ferrari.* 30 B, 325
- Donor ground states of group IV and III-V semiconductors, *M. Altarelli and G. Iadonisi.* 5 B, 21
- Drift instability of electron-phonon systems, *C. Caccamo and G. Ferrante.* 2 B, 93
- Dynamics of the relaxation from the metastable state for a Weiss ferromagnet, *P. L. Boschetti, N. Minnaja, R. Farabone and E. Montaldi.* 25 B, 159
- Effective-mass theory in real semiconductors (The): excitons and impurities in diamond and zincblende lattices, *N. O. Lipari.* 23 B, 51
- Effect of water vapour on thermoelectret behaviour, *P. K. C. Pillai, K. Jain and V. K. Jain.* 11 B, 339
- Electrical and optical properties of zinc-doped alkali halides, *S. Radhakrishna.* 4 B, 169
- Electrical resistivity of alkali metals (Temperature variation of the), *Saty Pal.* 21 B, 195
- Electroacoustic and magnetoacoustic amplification (Scattering dependence of), *S. Bosi and C. Jacoboni.* 18 B, 209
- Electromagnetic responses in the proposed mixed phase (Some). - II, *S. C. Lo and K. W. Wong.* 10 B, 383
- Electron correlations and plasmon dispersion in metals, *M. Parrinello and M. P. Tosi.* 12 B, 155
- Electron energy spectrum in a magnetic field for nonconvex bounded energy-constant surfaces, *M. Giura, R. Marcon and P. Marietti.* 29 B, 49
- Electron gas model for the lattice dynamics of thallium and zirconium (An), *S. P. Singh, J. R. Maurya and S. S. Kushwaha.* 29 B, 159
- Electron-hole exchange contributions to the biexciton states, *J. J. Forney, A. Quattrapani and F. Bassani.* 22 B, 153
- Electron-hole interaction effects at M_1 critical points in the presence of an electric field, *W. Andreoni and R. Del Sole.* 24 B, 85
- Electronic effects in dynamical structure of liquid metals, *M. P. Tosi, M. Parrinello and N. H. March.* 23 B, 135
- Electronic phase in semi-metals (Possible new). - I, *S. C. Lo and K. W. Wong.* 10 B, 361
- Electronic states for impurities near surfaces, *G. Iadonisi and B. Preziosi.* 27 B, 193
- Electronic structure of GaSe (The), *M. Schlüter.* 13 B, 313
- Electron-ion interaction by the canonical-transformation method (The effective), *L. G. de Freitas and R. Lobo.* 1 B, 34
- Electron-lattice interaction in layered semiconductors, *Ph. Schmid.* 21 B, 258
- Electrons in a solid to X-rays (Nonlinear response of), *S. S. Jha and J. W. F. Woo.* 10 B, 229
- Electron spin resonance in small particles of silver: the quantum size effect, *R.*

- Monot, C. Narbel and J.-P. Borel.* 19 B, 253
- Electron spin resonance study of manganese antipyrine complex in concentrated solution, *B. N. Misra, S. D. Sharma and S. K. Gupta.* 19 B, 129
- Electron spin resonance study of powdered copper complexes, *B. N. Misra and S. K. Gupta.* 18 B, 285
- Electroreflectance of silver, *R. Garrigos, R. Kofman, A. Jolivet and J. Richard.* 8 B, 242
- Energy band structure calculation of KCl in the crystalline state, *S. M. Mujibur Rahman, A. M. Harun Ar Rashid and S. M. M. R. Chowdhury.* 25 B, 803
- Energy band structure of RbCl and CsCl, *E. Donato, E. S. Giuliano and R. Ruggeri.* 15 B, 77
- E.P.R. study of reactor-irradiated polycrystalline α -Al₂O₃ and defective aspects in α -Al₂O₃ systems (An), *A. Galli.* 18 B, 11
- EPR study of solid solutions between ZnGa₂O₄ and ZnCr₂O₄ (An), *F. Gesmundo.* 25 B, 795
- ESR line shapes, line widths and *g*-values of some recrystallized free-radical powders (Study of), *B. N. Misra, S. K. Gupta and S. D. Sharma.* 5 B, 145
- ESR line width and exchange narrowing in recrystallized samples of hydrazyl and carbazyl, *B. N. Misra, S. K. Gupta and S. D. Sharma.* 10 B, 560
- Exchange and correlation contribution to one-body potential in metallic Be, *J. C. Stoddart, P. Stoney, N. H. March and I. B. Ortenburger.* 23 B, 15
- Exchange for K and Cu (Nonlocal screened), *H. Bross, C. Merkel and H. Stöhr.* 23 B, 27
- Excitations in liquid helium (Neutral), *P. Calvani, C. De Simone, A. Giovannelli and B. Maraviglia.* 19 B, 271; 21 B, 227 (E.C.)
- Exciton in a magnetic field (1s and 2s states of direct), *L. Świerkowski.* 29 B, 340
- Exciton polaritons (Anisotropic), *E. Tosatti and G. Harbeke.* 22 B, 87
- Excitons in a magnetic field (Ground and first excited states of), *D. Cabib, E. Fabri and G. Fiorio.* 10 B, 185
- Excitons in gallium selenide (The band-gap), *E. Mooser and M. Schlüter.* 18 B, 164
- Excitons in wurtzite-type semiconductors (Energy spectrum of direct), *N. O. Lipari.* 8 B, 406
- Fe-Ni alloys (Magnetic-moment distribution in): experiment and calculations, *F. Menzinger, F. Sacchetti and F. Leoni* 20 B, 1
- Ferromagnetic alloys (Coherent-potential approximation with orbital degeneracy in). An application to ferromagnetic Co-Ni alloys in f.c.c. phase, *F. Leoni and F. Sacchetti.* 21 B, 97
- Ferromagnet via equal coupling between itinerant and localized electrons (Spin- $\frac{1}{2}$), *J. O. Lawson, S. J. Brient and R. E. Bruce.* 20 B, 225
- Fluorescence lines of Cr³⁺ and Er³⁺ in YAG (Thermal dependence of the positions and widths of the), *J. T. Karpick and B. Di Bartolo.* 7 B, 62
- Formation of either tilt or twist boundaries in Ge, *E. Bonetti, P. Gondi and S. Valeri.* 28 B, 244
- Formulation of itinerant-electron ferromagnet (Self-consistent), *M. N. Shah and G. Vitiello.* 30 B, 21
- Galvanomagnetic effect of bismuth from 80 °K to 300 °K (Low-field), *C. Q. Ma, P. K. Tseng, Y. S. Way and P. K. L. Chang.* 21 B, 117
- Gravitational fields in metals (Electric fields induced by), *M. C. Leung.* 7 B, 220
- Ground-state energy calculation of the electron-hole liquid in semiconductors, *P. Vashishta, P. Bhattacharyya and K. S. Singwi.* 23 B, 172
- Gruneisen parameters of h.c.p. metals (On), *J. R. Maurya and R. S. Srivastava.* 28 B, 395
- Hybridization on the spin polarization (Effect of *s-d*): doubly degenerate *d*-band in Hartree-Fock approximation, *A. Troper and A. A. Gomes.* 28 B, 171
- Hydrodynamic response of inhomogeneous metallic systems, *S. C. Ying.* 23 B, 270
- Hydrogen (Metallic). - IV: Equation of state, *E. Stoll, P. F. Meier and T. Schneider.* 23 B, 90
- Hysteresis at *H_{c1}* for type-II/1 superconductors (Prediction of an intrinsic), *L. Lepaie, V. Srinivasan and H. Umezawa.* 28 B, 39
- Impurities in neutral liquids (Mobility of charged), *R. Lobo.* 20 B, 113
- Indirect two-photon interband transitions and of direct three-photon transitions in semiconductors (Analysis of), *F. Bassani and A. R. Hassan.* 7 B, 313
- Indium antimonide at room temperature

- (Size effect of), *Yu-Tung Yang, Hong-Tzer Ho, Cheng-Chih Pei, Shung-Chen Yang and Biao-Shian Yu.* 16 B, 188
- Interaction energy of substitutional atom pairs with the magnetization in Fe-Al alloys (On the), *G. P. Soardo.* 3 B, 15
- Ionic thermocurrent and optical-absorption measurements in KCl:Sr under reactor irradiation, *G.-M. Sordi and S. Watanabe.* 25 B, 145
- Isothermal current decay in anthracene crystals, *T. Garofano and T. Corazzari.* 26 B, 23
- I.T.C. measurements (On), *L. Nunes de Oliveira and G. F. Leal Ferreira.* 23 B, 385; 25 B, 495 (E.C.)
- Josephson effect (A model of the), *L. A. Turski.* 10 B, 102
- Josephson effect (A solvable model for the). (An algorithm for solving fermion systems. - II), *J.-P. Eckmann and M. Guenin.* 16 B, 93
- L-absorption edges of samarium in metal and in its oxide, *M. S. Kushwaha, B. D. Shrivastava and V. S. Dubey.* 19 B, 169
- Lattice-dynamical calculations for nickel, *Satya Pal.* 30 B, 299
- Lattice dynamics of anisotropic metals (A simple phenomenological model for the), *U. S. Ram and S. S. Kushwaha.* 27 B, 259
- Lattice dynamics of cobalt, *O. N. Singh and S. S. Kushwaha.* 21 B, 354
- Lattice dynamics of cubic transition metals (Noncentral-force model for the), *S. S. Kushwaha.* 20 B, 83
- Lattice dynamics of transition metals, *R. P. Bajpai and K. Neelakandan.* 7 B, 177
- Lattice dynamics of transition metals (Electron gas model for the), *J. S. Rajput and S. S. Kushwaha.* 19 B, 261
- Lattice statics of orthorhombic sulphur, *R. P. Rinaldi and G. S. Pawley.* 16 B, 55
- Light scattering from phonons in crystals (Theory of nonlinear), *S. S. Jha and J. W. F. Woo.* 2 B, 167
- Liquid alkali metals (Transport properties of), *G. Cubiotti, E. S. Giuliano and R. Ruggeri.* 3 B, 193
- Liquid binary alloys (Electronic properties of). - I: Transport coefficients of the $\text{Cu}_x\text{-Sn}_{1-x}$ alloy, *G. Cubiotti, E. Donato, E. S. Giuliano and R. Ruggeri.* 9 B, 154
- Liquid mercury (On the structure of), *S. Franchetti.* 18 B, 247
- Localization theory in a one-dimensional disordered lattice, *J. Chahoud, L. Ferrari and G. Russo.* 25 B, 1
- Longitudinal-relaxation time of the electronic magnetization of a microcrystal (On the), *D. Borel, J. Dolivo, J. P. Borel and A. Quattropani.* 26 B, 272
- Magnetic circular dichroism in the C-band of KBr:Ti (Measurements of), *V. Grasso, P. Perillo and G. Vermiglio.* 13 B, 42
- Magnetic-field effects on the absorption bands of KBr:Ti and KBr:In, *C. Bagnato, V. Grasso, P. Perillo and G. Vermiglio.* 26 B, 263
- Magnetic-moment distribution in f.c.c. $\text{Co}_{0.91}\text{Fe}_{0.09}$ alloy (Temperature dependence of), *F. Menzinger and A. Paoletti.* 10 B, 565
- Magnetic susceptibility of interacting (s-d)-spin system, *R. Luzzi and C. Terrile.* 16 B, 293
- Magneto-plasma surface waves in solids, *K. W. Chiu and J. J. Quinn.* 10 B, 1
- Memory effects associated with bulk viscosity on the spectrum of stimulated Brillouin scattering, *F. Barocchi, R. Vallauri and M. Zoppi.* 14 B, 39
- Microwave absorption in compressed N_2O , *A. Battaglia and L. Moi.* 28 B, 80
- Molecular-field ferro- and antiferromagnet (Randomly dilute), *R. A. Tahir-Kheli, L. C. M. Miranda and S. M. Rezende.* 30 B, 335
- Mollwo-Ivey relation for defect centres in alkali halides (An extended), *S. Radhakrishna and A. M. Karguppar.* 10 B, 66
- Mössbauer study of antiferromagnetic CuFeS_2 , *Hang Nam Ok and Chul Sung Kim.* 28 B, 138
- Motions in classical liquids (Collective). - III: Liquid sodium, *K. N. Pathak, K. S. Singwi, G. Cubiotti and M. P. Tosi.* 13 B, 185
- Noncentral forces and lattice vibration in transition metals, *V. P. Singh, J. Prakash and M. P. Hemkar.* 28 B, 476
- Nonparabolicity and intrinsic carrier concentration in Si and Ge, *G. Gagliani and L. Reggiani.* 30 B, 207
- 1/f noise as a two-parameter stochastic process, *A. Stepanescu.* 23 B, 356
- Optical electromodulated properties of a single crystal of gold, *R. Garrigos, R. Kofman and J. Richard.* 13 B, 272
- Optical energy gaps of substitutional solid solutions between some sulphides and

- selenides of II-VI compounds (On the), *A. Congiu, P. Manca and A. Spiga.* 5 B, 204
- Optical gap of SrTiO_3 (Determination of the nature of the), *M. Capizzi and A. Frova.* 5 B, 181
- Optical gaps and interband matrix elements of silver as a function of temperature, *F. Antonangeli, E. Colavita, R. Rosei and S. E. Salusti.* 24 B, 121
- Oscillations of the magnetic moments at 96 MHz in $\text{Ba}_2\text{Zn}_2\text{Fe}_{12}\text{O}_{22}$ planar ferrite (Large-amplitude): collapse of the hyperfine fields, *G. Albanese, G. Asti and S. Rinaldi.* 6 B, 153
- Parameters of Cu films (Structural), *Kh. M. Mannan and B. Chakravarty.* 26 B, 148
- Parametric effects in interacting magnon systems (Finite-temperature theory of), *U. Balucani, F. Barocchi and V. Tognetti.* 12 B, 83
- Phase shift in crystals (On the rôle of the), *G. Iadonisi and B. Preziosi.* 15 B, 45
- Phase transition in systems with negative anharmonic coupling constant (Structural), *A. Holz.* 20 B, 196
- Phase transitions (Perspectives from the theory of), *G. Toulouse.* 23 B, 234
- Phase transitions in some Dicke-type models, *B. M. Pimentel and A. H. Zimmerman.* 30 B, 43
- Phenomena in weakly-coupled superconductors (Time-dependent), *L. Leplae, F. Mancini and H. Umezawa.* 10 B, 267
- Phonon dispersion curves, frequency spectrum and specific heat of potassium, *Satya Pal and V. P. Seth.* 21 B, 109
- Phonon dispersion relations of anisotropic h.c.p. cadmium (On), *S. P. Singh, J. R. Maurya, S. S. Kushwaha and S. M. Mishra.* 30 B, 402
- Phonon mass defect scattering (A note on), *S. Ragusa.* 26 B, 229
- Phonons in an anharmonic crystal to $O(\lambda^4)$ (Self-energy of), *R. S. Tripathi and K. N. Pathak.* 21 B, 289
- Phonons in a strong static magnetic field, *A. Holz.* 9 B, 83
- Phonon waves in solid krypton (Dispersion of), *J. B. Salzberg and M. M. Shukla.* 17 B, 166
- Photoconduction and hyperelectronic polarization in xanthene organic polymer, *A. P. Srivastava and D. P. Agrawal.* 27 B, 94
- Photoelectret state applied to CdS type photoconductors (Analysis of), *P. K. C. Pillai and K. G. Balakrishnan.* 15 B, 284
- Photoelectroluminescence in ZnS, *V. Maxia, C. Muntoni, M. Murgia and C. Cortese.* 15 B, 121
- Photoluminescence of GaSe, *J. P. Voitchovsky and A. Mercier.* 22 B, 273
- Polarization phenomena induced by cracks in Ih ice crystals, *U. del Pennino, A. Loria, S. Mantovani and E. Mazzega.* 24 B, 108
- Positron-alkali-atom bound states (Model-potential theory of). - I: Ground-state energy and atomic properties, *P. Cavaliere and G. Ferrante.* 14 B, 127
- Positron-alkali-atom bound states (Model-potential theory of). - II: Annihilation characteristics, *P. Cavaliere and G. Ferrante.* 14 B, 147
- Positron annihilation in alkali metals, *O. Hipólito and R. Lobo.* 21 B, 182
- Positronium annihilation in magnetic fields up to 21 kG, *P. Colombino and B. Fiscella.* 3 B, 1
- Potentials of simple metals (Interionic), *S. K. Srivastava.* 17 B, 229; 18 B, 395 (E.C.)
- Potentiel d'interaction intervenant dans quelques complexes excitoniques (Etude du), *S. G. Elkomoss et B. Stebe.* 10 B, 255
- Pressure for two-body Ising models (On analyticity properties of), *A. Messenger and J. C. Trotin.* 19 B, 239
- Properties of the quasi-one-dimensional electron-phonon systems (Dynamical), *A. Bjeliš, K. Šaub and S. Barišić.* 23 B, 102
- Quasi-particle energies in aluminium, *G. Arman and U. von Barth.* 23 B, 37
- Quasi-particle properties in an electron-hole liquid, *T. M. Rice.* 23 B, 226
- Quench-enhanced ordering of Fe 50-Ni 50 alloy (On), *A. Ferro, G. Griffa and I. Ortalli.* 3 B, 269
- Radial distribution functions in solid and liquid argon, *S. Franchetti.* 26 B, 507
- Radial distribution functions of «model» disordered structures, *G. Cubiotti, E. Donato, E. S. Giuliano and R. Ruggeri.* 25 B, 35
- Radial-function distributions for the rare-earth ions and their dependence on the calculation method (Moments of), *M. L. De Siqueira and D. E. Laborne e Valle.* 10 B, 459
- Rare-earth h.c.p. metals (Modified noncen-

- tral-force model for), *R. Pratap and S. S. Kushwaha*. 11 B, 138
- Reflectivity of bismuth telluride (Wave-length-modulated), *V. Grasso, G. Mondio and G. Saitta*. 26 B, 233
- Reflectivity of laser-irradiated solid surfaces (Experiments on), *L. Muzii, L. Stagni and G. Vitali*. 14 B, 173
- Relaxation in a model problem for the Auger process (Incomplete), *C. O. Alm-bladh*. 23 B, 75
- Resistivities of noble metals (Electrical and thermal), *J. Prakash and M. P. Hemkar*. 25 B, 45
- Resonant states for a realistic impurity problem in crystals; discussion of *L*-bands in alkali halides, *M. Altarelli and G. Iadonisi*. 5 B, 36
- Response function of a finite electron gas (On the), *F. Toigo*. 25 B, 557
- R.f. method for precise size effect measurement, *Yu-Tung Yang*. 28 B, 87
- Saturation approach law of longitudinal magnetostriction in grain-oriented ferromagnetic cubic materials, *M. Celasco*. 9 B, 425
- Scattering from liquid metals and alloys and electronic correlation functions (Small-angle), *M. P. Tosi and N. H. March*. 15 B, 308
- Sound velocity and absorption in amorphous silica, *S. Ballarò, G. Cubiotti, M. Cutroni, S. Frassica and F. Wanderlingh*. 25 B, 13
- Spectra of the Heisenberg linear chain (Some remarks on the), *G. Ananthakrishna*. 16 B, 106
- Spin diffusion in the dynamic polarization by solid effect (The), *V. Montelatici*. 17 B, 129
- Spin Hamiltonian for completely anisotropic *g*-factor and hyperfine coupling tensors (The), *H. A. Farach and C. P. Poole jr*. 4 B, 51
- Spin-lattice relaxation time of conduction electrons in alkali metals: sodium, *J. T. Lue*. 22 B, 1
- Spin quintet states by electron paramagnetic resonance (Investigation of), *M. Maćkowiak*. 29 B, 207
- Spin wave energy in the Heisenberg antiferromagnet with dipolar interaction by the Green-function method (Renormalized), *F. Leoni*. 18 B, 277
- Substitution of Fe^{3+} by Al^{3+} in the trigonal sites of *M*-type hexagonal ferrites, *G. Albanese, M. Carbuicchio and A. Deriu*. 15 B, 147
- Surface correlation energy—An interpolation formula, *G. Srinivasan, M. Jonson and S. Lundqvist*. 29 B, 285
- Surface states or excitations in general (Green's functions in the study of), *F. Flores*. 14 B, 1
- Surface structure determination by low-energy electron diffraction, *C. B. Duke, N. O. Lipari and G. E. Laramore*. 23 B, 241
- Systems of CaH and CaD in the UV region (Two overlapping), *M. Aslam Khan and S. S. Hasnain*. 18 B, 384
- Temperature dependence of the *g*-shifts of conduction electrons in pure and impure alkali metals (The), *Juh-Tzeng Lue*. 26 B, 243
- Thermal diffusion in liquid metals (On), *V. Gallina and M. Omini*. 8 B, 65
- Thermodielectric effect and freezing potential in growing ice, *M. Cassettari and G. Salvetti*. 12 B, 95
- Thermodiffusive behaviour of NaCl and KCl aqueous solutions: a model for the Na-K pump, *F. S. Gaeta, D. G. Mita, G. Perna and G. Scala*. 30 B, 153
- Thermodynamic limit for the master equation (A continuum), *P. L. Boschetti, N. Minnaja and E. Montaldi*. 16 B, 203
- Thermoelectric power of chromium-silicon alloys (Absolute), *S. Araj, E. E. Anderson and E. E. Ebert*. 4 B, 40
- Time-amplitude correlation effect between Barkhausen discontinuities (in the magnetization noise), *M. Celasco, F. Fiorillo and P. Mazzetti*. 23 B, 376
- Transfer matrix formalism (Basic), *J. Chahoud, L. Ferrari and G. Russo*. 26 B, 171
- Transition h.c.p. metals (Noncentral-force model for), *S. S. Kushwaha and A. Kumar*. 11 B, 301
- Transport properties of liquid alkali metals. - II: Temperature dependence of resistivity of Rb and Cs, *G. Cubiotti, E. S. Giuliano and R. Ruggeri*. 6 B, 37
- Trap distribution and photoconductivity in ZnIn_2Se_4 and ZnIn_2Te_4 , *P. Manca, F. Raga and A. Spiga*. 19 B, 15
- Trapping effects in pulsed photoconductivity of anthracene crystals, *T. Garofano*. 21 B, 376
- Trapping levels in anthracene crystals by thermally stimulated currents, *T. Garofano and S. Morelli*. 13 B, 174

- Trapping levels in anthracene crystals from the study of thermally stimulated currents (On the nature of), *G. Aprilesi, T. Garofano, F. Nava and M. Santangelo.* 1 B, 85
- Two-photon absorption in semiconductors in a magnetic field, *R. Girlanda.* 6 B, 53
- Two-photon absorption in the presence of an electric field, *A. R. Hassan and A. R. Moussa.* 28 B, 27
- Two-photon conductivity in ZnS and CdS, *A. Cingolani, F. Ferrero, A. Minafra and D. Trigiante.* 4 B, 217
- Two-photon exciton transitions in semiconductors (Phonon-assisted), *A. R. Hassan.* 13 B, 19
- Two-photon interband transitions at critical points in semiconductors, *A. R. Hassan.* 1 B, 56 (E.C.)
- Tyablikov theory for the spin- $\frac{1}{2}$ ferromagnet compared to the spontaneous magnetization of nickel (The), *S. J. Brient and J. O. Lawson.* 17 B, 196
- Variational treatment of elastic scattering of electrons from semi-infinite lattices (Approximate), *V. V. Bhokare and M. Yussouff.* 16 B, 331
- Vibration amplitudes of silver surface atoms, *G. Rovida, M. Torrini and E. Zanazzi.* 4 B, 97
- Vibrational properties of heavy rare-gas solids (The effect of zero-point anharmonicity on the), *R. K. Gupta and N. P. Gupta.* 6 B, 29
- Viscosity field and induced anisotropy energy in ferromagnetic alloys (On the relation between magnetic), *A. Carta.* 8 B, 399
- ZnS electroluminescence (Spectral composition of the), *V. Maxia, C. Muntoni and M. Murgia.* 17 B, 257
11. ASTROFISICA
- Black holes (On the nonexistence of extreme), *B. H. Voorhees.* 29 B, 63
- Brans-Dicke theory and anisotropic cosmologies (The), *R. A. Matzner, M. P. Ryan and E. T. Toton.* 14 B, 161
- Charged-particle creation in cosmology, *P. C. W. Davies.* 6 B, 164
- Collapse of some charged-dust distributions, *U. K. De.* 15 B, 61
- Cosmic rays and the origin of the light elements (Pulsar-produced), *K. Sitte.* 7 B, 110
- Cosmological consequences of imaginary mass (Some), *P. C. W. Davies.* 25 B, 571
- Cosmological models in an extension of Yilmaz' theory of gravitation, *B. O. J. Tupper.* 2 B, 148
- Dust clouds (Global description of spherical collapsing and expanding), *P. Szekeres.* 17 B, 187
- Electromagnetic radiation emitted by charged rings falling in black holes, *S. Mavrides.* 27 B, 323
- Electron bremsstrahlung from hot plasma in the presence of strong magnetic field, *A. El-Gowhari and J. Arponen.* 11 B, 201
- Electron pair production in extra-galactic sources (Bootstrapped), *S. A. Bonometto and F. Lucchin.* 18 B, 225
- Emission from anisotropic cosmic dust (Infra-red polarized), *S. Aiello, A. Bonetti and F. Mencaraglia.* 23 B, 297
- Energy release from colliding black holes, *D. K. Ross.* 6 B, 83
- Energy spectrum and composition of pulsar-accelerated cosmic rays, *K. Sitte, L. Briatore and M. Dardo.* 10 B, 498
- Finite expanding universe with matter injection (A), *F. M. Gomide.* 12 B, 11
- Gamma emission from thermal X sources (A model for), *S. Serio.* 28 B, 143
- Gamma rays from pulsars (Results of a search for 10^{12} eV), *D. M. Jennings, G. White, N. A. Porter, E. O'Mongáin, D. J. Fegan and J. White.* 20 B, 71
- γ -rays in the Crab Nebula pulsar (Production of), *A. Treves.* 4 B, 88
- General relativity, unitarian Einstein theory, expansion and age of the Universe, *M. Pierucci.* 21 B, 69
- Gravitational red-shift, *D. K. Ross.* 2 B, 55
- Gravitational scintillation (Absence of), *B. Bertotti and D. Treves.* 7 B, 240
- Gravitational waves and cosmology, *B. Bertotti and A. Cavaliere.* 2 B, 223
- Gravity generation of electromagnetic radiation and the luminosity of quasars (A), *L. Motz.* 9 B, 77
- Hooke's symmetries and nonrelativistic cosmological kinematics. - I, *J.-R. Derome and J.-G. Dubois.* 9 B, 351
- Hydrogen gases (A possible origin of the high-velocity neutral), *T. L. Chow and M. P. Savedoff.* 8 B, 130

- Images produced by gravitational light deflection (Some), *R. Christensen*. 15 B, 69
- Infra-red background astronomy at ground (Far), *G. Dall'Oglio, S. Fonti, I. Guidi, B. Melchiorri, F. Melchiorri and V. Natale*. 27 B, 27
- Instability of two streams in the presence of a uniform rotation and a uniform magnetic field (Gravitational), *R. S. Sengar and H. C. Khare*. 9 B, 122
- Linear theory of gravitation (Cosmological solutions to a), *H. O. Girotti and D. Wisnivesky*. 4 B, 205
- Mach's principle in Newtonian cosmology, *A. M. Anile*. 29 B, 31
- Magnetic field in the plasmasphere of a compact star, *R. H. Cohen, B. Coppi and A. Treves*. 13 B, 59
- Magnetic irregularities in interplanetary space and geomagnetic activity, *B. Bavassano, A. M. Conforto and B. Ludovici*. 13 B, 161
- Neutral-pion decay and the gamma radiation from our galaxy (The), *G. Cavallo and E. J. Gould*. 2 B, 77
- Nongeodesic radial accretion (On), *A. E. Hwang and J. J. Dykla*. 15 B, 210
- Oscillations of cold nonrotating neutron stars (Stability of nonradial). - I: General method, *L. Battiston, P. Cazzola and L. Lucaroni*. 3 B, 295
- Partial-coalescence model for colliding interstellar clouds (A), *J. S. Goldstein and A. J. Mazzella jr.* 21 B, 142
- Particle creation caused by the expansion of the Universe (Quantum-mechanical analogue of), *J. Audretsch*. 17 B, 284
- Perfectly conducting medium in general relativity (The), *S. Banerji*. 23 B, 345
- Point sources in a nonhomogeneous universe, *F. de Felice*. 7 B, 333
- Propagation of steady solar injected particles (Interplanetary), *S. Cecchini and N. J. Martinic*. 25 B, 191
- Redshift-magnitude relation for radiation universes (A), *S. E. Kaufman*. 13 B, 91
- Relativistic invariance and the expansion of the Universe, *A. Bergström*. 27 B, 145
- Rigidly rotating component of the solar corona, *E. Antonucci*. 25 B, 513
- Scattering of two- and four-component neutrinos (Gravitational). Some remarks in the one-gravitation-exchange approximation, *D. Boccaletti, V. de Sabbata, P. Fortini and C. Gualdi*. 11 B, 289
- Search for correlations between radio-pulses and 10^{11} eV gamma-rays from NP 0532, *E. Argyle, G. Baird, J. Grindlay, H. Helmken and E. O' Mongain*. 24 B, 153
- Solar wind and geomagnetic activity, *V. Formisano, G. Moreno and C. Signorini*. 23 B, 473
- Stellar stability in Newtonian theory of gravitation with shadow effect, *C. C. Chiang and V. H. Hamity*. 30 B, 280
- Test particles in the field of a spinning naked singularity, *F. de Felice, M. Calvani and L. Nobili*. 26 B, 1
- Unit transformations and cosmology, *E. A. Lord*. 11 B, 185
- X-ray diffuse component in the range from 25 to 200 keV (A measurement of the primary), *E. Horstman-Moretti, F. Fuligni and D. Brini*. 6 B, 68
- ## 12. BIOFISICA
- ## 13. TECNICHE E MATERIALI - STRUMENTI - UNITÀ DI MISURA
- Capacitor for the attainment of gigavolt potentials (Magnetically insulated and inductively charged), *F. Winterberg*. 20 B, 173
- OSO-G satellite instrumentation for measurements of cosmic X-rays in the energy range from 25 to 190 keV, *D. Brini, F. Evangelisti, F. Fuligni and G. Vespi gnani*. 2 B, 193
- Telescopes for infra-red astronomy (Considerations about), *F. Melchiorri*. 8 B, 167
- ### 13.1. Tecniche
- Tracing of charged-particle trajectories in a prismatic uniform-field astigmatic spectrometer (Ray), *P. K. Bhattacharya*. 11 B, 167
- Transitions in muonic atoms using a high-power tunable dye laser coupled to a stopping muon beam (A new method to induce), *A. Bertin, G. Carboni, A. Placci, E. Zavattini, U. Gastaldi, G. Gorini, G. Neri, O. Pitzurra, E. Polacco, G. Torelli, G. Stefanini, A. Vitale, J. Duclos and J. Picard*. 23 B, 489
- Vibrating bar (Contactless parameter measurements of a), *M. R. E. Bichara*. 9 B, 453

14. GEOFISICA

- Analisi oggettiva di campi meteorologici
(Un procedimento di), *L. Bacchelli Montefusco, S. Tibaldi e A. Trevisan.* 28 B, 427
- Body force and body couple equivalents
for seismic dislocations in micropolar media, *E. Boschi.* 18 B, 293
- Convection in the Earth's core, *E. Boschi.* 28 B, 467
- Eckart's approach to the hydrodynamic
evolution of oceans and atmosphere (On),
M. Pulvirenti, B. Tirozzi and E. Salusti. 25 B, 295
- MHD Ekman layer on a porous plate, *S. Narasimha Murthy and R. K. Prabhakar Ram.* 29 B, 296
- Patterns of a seismic pulse within a solid,
perfectly elastic, homogeneous spherical
Earth (Reflection), *E. Boschi and E. Di Curzio.* 29 B, 189
- Polar cusps and of the high-latitude mag-

- netopause with the European satellite
HEOS-2 (Observation of the), *M. B. Bavassano-Cattaneo, P. Cerulli-Irelli and A. Egidi.* 26 B, 120
- Pressure in the sea (On the): a simple model,
C. Bardos and E. Salusti. 17 B, 320
- Seismic dislocation theory in pre-stressed
media, *E. Boschi and E. Di Curzio.* 28 B, 257
- Shock structures (Laminar and quasi-laminar),
V. Formisano and P. C. Hedgecock. 24 B, 1
- Van Allen belt (A theory of the), *G. Pizzella.* 8 B, 35
- Variational theorem in the theory of porous
media (A), *E. Boschi.* 16 B, 301
- Volterra dislocation relation for a thermo-
elastic, self-gravitating, rotating Earth
model (The), *E. Boschi.* 24 B, 242

IL NUOVO CENTENO della Società italiana di Fisica

© by Società Italiana di Fisica

Proprietà letteraria riservata

Direttore responsabile: RENATO ANGELO RICCI

Stampato in Bologna dalla Tipografia Compositori coi tipi della Tipografia Monograf

Questo fascicolo è stato licenziato dai torchi il 20-IX-1982

IL NUOVO CIMENTO

della società italiana di fisica

Quote di abbonamento al *Nuovo Cimento* B per l'anno 1982:

Per i Soci in Italia	L. 170.000
Per i non Soci in Italia	L. 210.000

Abbonamento cumulativo al *Nuovo Cimento*, Sezioni A, B, C e D, *Lettere al Nuovo Cimento*, *Rivista del Nuovo Cimento*:

Per i Soci in Italia	L. 660.000
Per i non Soci in Italia	L. 815.000

Coloro che desiderano ricevere i fascicoli per posta aerea dovranno assumersi le maggiori spese del trasporto aereo. L'ammontare di dette spese per il 1982 è, per l'Italia, di L. 700.

Le somme per l'abbonamento vanno versate (direttamente o per mezzo di un libraio) a **Editrice Compositori, viale XII Giugno, 1 - 40124 Bologna**, alla quale occorre rivolgersi anche per l'acquisto di volumi arretrati o numeri isolati.

Trascorsi 3 mesi dalla data di pubblicazione, non saranno più accettati reclami per i fascicoli non pervenuti.

Subscriptions to *Il Nuovo Cimento* B for the year 1982:

To members abroad	\$ 240.00
To nonmembers abroad	\$ 300.00

Combined subscription to *Il Nuovo Cimento*, Sections A, B, C and D, *Lettere al Nuovo Cimento*, *Rivista del Nuovo Cimento*:

To members abroad	\$ 930.00
To nonmembers abroad	\$ 1160.00

Subscribers who wish to receive their issues by air mail will be charged extra postage. The airmail postage for 1982 amounts to \$ 35.00.

Subscriptions should be sent, either directly or through a bookseller, to **Editrice Compositori, viale XII Giugno, 1 - I 40124 Bologna (Italy)**. Requests for back numbers or single copies should be directed to the same address.

3 months after publication we will not consider complaints for issues not received.
